

Primary PE & Sport Premium – Evidence of the Impact

School Name -

Year – 2014 / 2015

Focus / Priority – To improve the provision of High Quality PE & Sport in School by improving Staff confidence and ensuring sustainability

What was the Focus?	Why did we do it?
<p>Using the PE & Sport Premium we have been and still are focussing on developing High Quality PE & Sport accessible to all children. Our aims include providing a clear, structured curriculum that is sustainable and consistent and to improve the confidence of those teachers involved in the teaching of PE to deliver challenging, enjoyable and engaging lessons.</p>	<p>To show that we understand the value & impact of PE & Sport on our school and our children and to provide children with an environment in which they can enjoy a healthy, active lifestyle whilst developing physical, numeracy & literacy skills through their teaching & learning.</p>
How did we do it?	
<p>Claire Southam (our PE Specialist) has been in this year and delivered / offered 2 hours of High Quality PE lessons per week to all year groups alongside the teaching staff who have observed the delivery of all the lessons. (78 hours total) Complete sets of lesson plans for Dance & Athletics and their Schemes of Work in line with the new National Curriculum have been written this year, with a complete set of resources for all activities and this has been placed onto the school network for all staff to access, along with all of the activities completed from last year. Claire has also set up & run extra training for Staff after school, run a wide variety of extra-curricular sports and activity clubs such as Change for Life Club and organised a wide variety of Intra (Level 1) and Inter (Level 2) tournaments for all year groups including Multi-Skills, Tri-Golf, Bike Fest & Rounders this year. (See data below) Claire is helping our school to apply for the Sports Mark Award in association with the Sainsbury's School Games to recognise our improvement and participation in Sport outside of the curriculum. A PE web page has been set up, PE noticeboard and Key Words around school to raise awareness of PE and healthy active lifestyles and to provide information to staff, children and parents on the development of PE & Sport in school. A new Gifted & Talented / Inclusion policy has been added to the School's policies to ensure all children are provided for in PE lessons and outside of school, alongside a list of those students deemed Gifted & Talented in PE. A full audit of our school PE equipment has been carried out with some equipment already purchased, and a full audit to enable us towards the route to "Outstanding" is being monitored by Claire Southam & our PE Co-ordinator in order to continue with our development. This is done at the termly meetings.</p>	

What did it cost?	What difference have you made?	Who benefitted & how?
<p>£8000 +£5 per child DFE government funding to Primary Schools.</p> <p>£1,250 of this to the Primary Schools has been used for extra events & equipment</p> <p>£7,000 has been used to pay for the PE Specialist, transport to and from events & tournaments, resources such as photocopying, certificates and equipment.</p>	<p>100% of all staff who have worked with the PE Specialist now feel more confident & knowledgeable when delivering PE lessons.</p> <p>Some staff have been trained to run specific sports and activity clubs for all children, including targeting those children that maybe more disaffected.</p> <p>More children have taken part in activities and sport than last year and are experiencing enjoyable and engaging lessons with a wide variety of activities, which will help them in their efforts to lead a more, healthy, active lifestyle. (See below for full data)</p>	<p>All teaching Staff by improving their knowledge and confidence to deliver lessons safely.</p> <p>Children have more engaging and enjoyable lessons which challenge and cater for everybody in the lesson. This will help them to lead healthier, more active lifestyles.</p>
What feedback have you had?		
<p>OFSTED after observing our PE Specialist, Claire Southam, teach at one of the Primary schools quoted “The Sports Premium Funding is being used effectively to improve the skills of teachers to deliver high quality lessons in Physical Education. As a result, pupils are much more involved in physical & health-related activities”.</p> <p>Staff have completed written evaluations of all lessons and CPD.</p> <p>100% of staff felt that the content, delivery, engagement & enjoyment of the children in lessons was of a very high standard.</p> <p>One member of staff quoted “I definitely feel I have benefitted from working alongside Claire. My subject knowledge has developed & I feel I have gained many ideas from Claire. For example, planning exciting & engaging lessons, how to use some of the equipment and use it safely, providing opportunities for children to peer and self-assess and also how to differentiate in PE accordingly”.</p> <p>Some staff have completed a “self-review” sheet at the start of the term and then the PE specialist worked with those staff to develop the aspects of teaching a lesson they found most challenging. This was then reviewed at the end of the term.</p> <p>100% of staff who completed the self-review sheet feel that they have improved in more than one area of teaching a high quality PE lesson.</p> <p>The majority of teachers have moved up 1 or 2 stages of the review sheet on most of the areas, and now feel that they are “good or outstanding” in those areas.</p>
